

There is only one NEW ZEALAND ASSOCIATION of RADIO TRANSMITTERS. It serves you at local, national and international levels. It deserves our full support if we are to continue to have the frequencies and operating privileges we currently have. *The association is what you and I make it!*

NZART Infoline # 502

August 2025

From HQ...

Promotional Material for Amateur Radio

I am often asked by members and branches if NZART or more specifically headquarters has any promotional material to 'give away' or hand out to potential hams at events.

The simple answer is yes, but only in the form of a brochure, that has an area in it to include your branch contact details. But I regret that is all we have.

I have asked for ideas and suggestions in the past about what promotional material you believe would be a benefit for promoting amateur radio.

I am still very keen to hear from you, if the price is right, we will endeavour to oblige. However, it was disappointing last year when

Sara asked for a response from branches to purchase their own flags. These were offered at a much reduced rate, as we were hoping to purchase in bulk, this offer has now lapsed.

Sub invoices 2026

As mentioned in the official broadcast, I will soon be sending out the annual subscription invoices

These will be emailed to all members for whom I currently have an email address.

I aim to have this completed by mid-August. If you're unsure whether I have your correct email address, please send me an email and I'll be happy to check it against our database.

Last year, invoices were titled using your call sign. This was due to how the data was imported into Xero, our accounting software. I'm currently working through the membership list to include names on invoices this year. For joint memberships, the name of the primary member will appear on the invoice, but it will still include both call signs.

As always, payment can be made by direct credit — our preferred method — or by credit card. If you'd like to pay by credit card, please email or call me directly with your details. Unfortunately, we don't offer online credit card payments due to the high costs of providing that service.

An optional \$15 discount is available for joint membership subscriptions if payment is received on or before the 30th of November, 2025.

Talk soon...Debby ZL2DL

From the Vice President - ZL2AJ

Hi all. Council is seeking submissions on a proposal to allow the use of SSB within the 30 m band. [Please see the attached proposal.](#)

Feedback can be sent to warren@zl2aj.com . Please include 10 MHz band plan in the subject line.

Submissions to the proposal close at the 31st of August.

Thanks

Warren ZL2AJ

Parks On the Air

The Parks on the Air (POTA) awards program currently has five official events each year. The main purpose of these events is to get people out in the parks and to have as much fun as possible. New Zealand currently has over 800 POTA parks and there will likely be a POTA park close to you. And there are more than 75,000 POTA parks overseas for you to chase!

The date for the next official events are -

Autumn - the third full weekend of October. October 18-19, 2025.

New Year - the first seven days of 2026. January 1-7, 2026.

Winter - the third full weekend of January. January 17-18, 2026.

Spring - the third full weekend of April. April 18-19, 2026.

Events start at 00:00:00 UTC and end 23:59:59 UTC on the days listed.

Past official POTA events have been very popular and the events listed above are likely to be. This popularity will give you many opportunities to make contacts, either as an activator or a chaser.

I hope to hear you on the air during these events.

73 Philip ZL1PSH

Hi all.

Please [click here](#) for your branch Newsletters or circulation, and in your branch nets.

Look forward to receiving registration requests from many.

I hope this is successful as it is in my head.

If I have missed branches from the coverage pattern please feel free to forward on.

Thanks.

Warren – ZL2AJ

Contests

Reminder that the Winter Sprints are running each Tuesday night in August with your outside air temperature as the exchange. A lot of fun

and something for everyone: SSB, CW and FT4. Check out the rules on the NZART Contest web page or contact contests@nzart.org.nz

International News

Operating Patterns in Canada - survey by Radio Amateurs of Canada

In 2021, Radio Amateurs of Canada (RAC) conducted a survey of radio amateurs in Canada. The survey focused on operating patterns among radio amateurs, including how active they are in various specific aspects of the hobby, the frequencies and antennas used, and some key demographics. There were 2,089 respondents, 78% of whom were members of the RAC.

Frank Howell K4FMH published a report that gives a full analysis of the survey data. The report is available

at <https://www.amateurradio.com/the-popularity-of-specific-operating-activities-among-canadian-hams/>. The report contains

many insightful graphics. Pages 31 to 36 of the report give a summary and the key conclusions for amateur radio in Canada. Some conclusions, especially those about demographics, could well apply to amateur radio in New Zealand.

Ground Based Space Infrastructure Legislation and how it doesn't affect hams

This is a subject most ZL hams won't even have thought about, but affects us by not affecting us... that said, those hams who have thought about it may like some reassurance, which is why I write.

The *Outer-space and Upper Atmosphere Activities Amendment Act 2025* was passed under urgency and was given Royal Ascent on 25th July. During its drafting, the Act had the possibility of making hams

communicating via satellites or the ISS a ‘regulated activity’, which would have required authorisation and paperwork.

Because the bill was passed under urgency, there was no possibility for public consultation. However, I was one of a very few people who were consulted on the Bill because of my work; during consultation, I was emphatic with the officials the need to protect hams from being caught up with the Act and I believe that I succeeded in so doing. Also, I arranged for the Minister for Space, Hon. Judith Collins KC to confirm to the House—and thus be recorded in Hansard—that amateurs communicating via satellites would not be a regulated activity.

In essence s49A(2)(b)(ii) of the Act says that hams communicating with a space object is not a regulated activity because it is a recreational pursuit or hobby and s49A(2)(b)(v) means that using amateur satellites for SAR and Civil Defence is also not a regulated activity. So, nothing changes for hams and we can all carry on using the satellites as we always did.

Anyone wanting to read the legislation should go to www.legislation.govt.nz and undertake a simple search for the Act.
